ROCKVILLE, MD – The Biophysical Society is proud to announce its 2025 Society Fellows. This award honors the Society's distinguished members who have demonstrated excellence in science and contributed to the expansion of the field of biophysics. The Fellows will be honored at the Biophysical Society's 69th Annual Meeting, being held in Los Angeles, California from February 15-19, 2025. The [redacted], is named a Biophysical Society Fellow for pioneering

research on the mechanisms of the actin cytoskeleton and molecular motor proteins.
